REASON FOR ALLOWANCE

1. Claims 1-12 is allowed.
2. The prior art fails to teach or suggest a portable data processing device comprising: **a first display device for receiving signals for displaying first information; a second display device for receiving signals for displaying second information, said second display forming a skin of said data processing device; a graphics engine for receiving data for generating display signals for said first information and said second information said data for generating display signals received from a central processing unit (CPU) in response to a data processing application; and driver circuits coupled to said first and second display devices, wherein corresponding ones of said driver circuits are coupled to said first and second displays, said driver circuits coupled to an output of said graphics engine, and wherein said first and second display devices having disjoint display areas** as claimed in claim 1.

The prior art fails to teach or suggest a portable data processing system comprising: **a first display device for receiving signals for displaying first information; a second display device for receiving signals for displaying second information, said second display forming a skin of said data processing device; a first graphics engine for receiving data for generating display signals for said first information from a first frame buffer in a graphics memory; a second graphics engine for receiving data for generating display signals for said second information from a second frame buffer in said graphics memory; and driver**
